

# THE DEVIL OF DEVIATION

TUESDAY 20 MAY 2014, 15:00-17:00 - FINLANDSGADE 21, BUILDING 5335, ROOM 091

**Centre for IT Project Management and Innovation** is organising a research- and industryseminar on the management of uncertainty and deviation in project- and productmanagement.

**“Dealing with the Devil of Deviations: Managing Uncertainty during product development execution” by Professor Mats Engwall, KTH Stockholm**

Mats Engwalls research revolves around contemporary neo-industrial management, e.g. project based management, service operations and service innovation, management of industrial R&D and product development of goods and services, organizing of distributed production systems, and the structuration of contemporary engineering work. He holds several positions, and is the KTH Chair in Industrial Management. He is also one of the central figures in project management research in Scandinavia.

**“Developing software products in a fast-moving technology market” by Søren Mønsted, Director, Product Development, QIAGEN Aarhus**

**REGISTRATION:**

Registration at: [www.itprojectmanagement.au.dk](http://www.itprojectmanagement.au.dk).

Bring a colleague? There is limited seating.

Therefore, please notice that we need your **registration no later than Thursday 15 May 2014.**
